

XXII **FIAP** **INTERNACIONAL** **SEMINAR 2025**

13-14 OCTOBER, 2025
HOTEL MANDARIN- SANTIAGO-CHILE

FIAP'S BACKGROUND

The International Federation of Pension Fund Administrators (FIAP) brings together trade associations from the pension fund management industry, primarily from Latin America. The organization is dedicated to **generating content on pension-related issues and promoting public discussion.**

FIAP's objective is to strengthen the individual savings component of multi-pillar pension systems, ensuring sustainable pensions and fostering the development and depth of capital markets in the region.

Currently, the Federation is comprised of 10 countries: Chile, Colombia, Costa Rica, El Salvador, Mexico, Peru, the Dominican Republic, Uruguay, Spain, and Kazakhstan.

FIAP INTERNACIONAL SEMINAR 2025

The central theme of the 22nd edition of the FIAP International Seminar, “**Pensions: New Challenges, New Strategies**”, will be the key role that individual capitalization systems play in delivering better pensions in a context of ageing societies.

The seminar will address, among other topics: the trends and challenges faced by pension systems in aging societies, particularly in our region where high labor informality is a major concern; the importance of adapting pension fund investments to new trends and the mechanisms available to maximize pension fund returns; and the role of technology and artificial intelligence in improving pensions.

As in previous editions, we will welcome national and international experts who will share their experience and knowledge on these topics. Participants from various regions around the world (including FIAP members and others) will attend, including government officials, legislators, representatives from international organizations, pension fund administrators, mutual funds, insurance companies, and other key figures from the financial and social security sectors.
